

The YPHOS RF Remote allows you to control your lights remotely from a distance of up to 120m / 400ft. It works with all YPHOS control hubs and uses a mutual-authentication technology for secure communication.

The RF Remote has been designed to be simple, intuitive and convenient to use, allowing you to quickly turn on or off your lights from anywhere within range.

Some hubs and lights offer extensive functionality like selecting the color or color show, enable/disable the fishing assist mode or the sound-to-light mode.

- Simple, easy to use
- Secure mutual-authentication tech.
- Easy pairing with YPHOS hubs
- Replicates the function of Switches
- Long-range control

Works with:

Basic Control Hub YHB-400

Y:Link-enabled Hub YHB-800

WiFi Brain YHB-WiFi

In the box:

RF Remote batteries installed

Keyring band

Warranty

2 Years

Material

Hard Plastic

Dimensions

60mm x 32mm x 9.5mm
2.36" x 1.27" x 0.37"

Weight

16g / 0.6 ounces

Battery

2 x CR2016 replaceable

Buttons / Commands

4 - function depends on receiver

Range

Up to 120m / 400ft at clear sight

Authentication

Yes, Mutual Authentication

Compatibility

Basic Control Hub YHB-400

On/Off Control, mirroring the functionality of an on/off switch and controlling the state of the internal relay. Lights with preset colors or modes will cycle through their presets like using a regular switch.

Y:Link-enabled Hub YHB-800

On/Off Control and Color Control, mirroring the functionality of the YPHOS Switch or any MOM - OFF - MOM switch. Top-left button on the remote turns the lights on or off. Top-right button cycles through the color modes of the Y:Link-enabled hub, overriding the lights' presets.

WiFi Brain YHB-WiFi

Extensive functionality - refer to the YHB-WiFi manual or specification sheet.

The RF Remote connects to any of the devices above to provide wireless control. It does not connect directly to any YPHOS light.
