

YPHOS Smartphone App

YPHOS Control is the official app for controlling YPHOS underwater lighting systems on boats and yachts. Designed with the same philosophy as the hardware itself, it delivers intuitive control, refined visuals, and seamless performance.

Create the perfect atmosphere below the waterline, from subtle ambient tones to powerful dynamic color scenes, all with smooth, responsive interaction.

Precise color selection, curated presets, animated light shows, and instant favorites allow the mood around the vessel to develop effortlessly.

- Remote control via Smartphone (iOS or Android)
- Easy RGBW color control
- Wide variety of Color Shows
- Wide variety of Preset Colors
- User-configurable Favorites
- Set start-up color
- Extensive Configuration
- Available for iOS and Android
